***Nadezhda Samchuk, 4th year student
6B07305 «Production of building materials, products and structures»***

The Technical University of Ostrava is part of the higher-level university system of the Czech educational system. It transfers knowledge, develops skills and creates a space leading to the professional growth of people and the development of society in the field of technical and economic orientation. The University cooperates with government organizations, local self-government bodies, domestic and foreign universities, scientific institutions, organizations and individuals.

The Faculty of Civil Engineering is the second oldest faculty of VŠB, it continues the 166-year tradition of teaching construction disciplines at this university. The Faculty of Civil Engineering provides universal construction education, as well as specific for the Moravian-Silesian region (construction in the mining zone, mitigation of the consequences of mining and industrial activities, production and processing of building materials, transport, underground and geotechnical structures, etc.).
