Based on the results of the questionnaire, the following conclusions can be drawn:

Choosing a specialty is a very important aspect in the life of young people. Some people do this consciously, while others do it unconsciously, due to a coincidence of external circumstances.

The study showed that the main factor in choosing a specialty among the surveyed students was 61.5% stands out personal inclination towards a certain type of activity, assessment of one's own abilities. Other relatively significant criteria were: «prestige of the specialty» - 23.1% and «opinions and recommendations of parents/relatives» - 15.4%.

The source of information about the university, faculties and specialties among the majority of first-year students are relatives and acquaintances (69.2%).

The majority of students report their satisfaction with the choice of educational program in which they study – 100%.

To the question «Are you able to cope with your course load easily? » only 61.5% of students answered that it was easy. The remaining 30.8% answered «difficult during the session» and 7.7% found it difficult to answer.

Relations «between students», «between teachers and students (in the educational process)», «between students and curators», «between students and administration», «between students and employees of departments (library, student department, etc.)», «between students and the security service» are being assessed by respondents, mainly as «friendly» and «with rather benevolent than unkind».

76.9% of students noted that they always have access to the necessary information regarding the educational process and extracurricular activities. However, 23.1% of respondents chose the answer «no, not always»

To the question «How do you evaluate the quality of the classes? » The following information was received:

- «The material is presented clearly, accessibly, in a logical sequence» student satisfaction was 100%;
- «During the classes, the main thing is highlighted, substantiated conclusions are made» student satisfaction was 92.3%;
- «During the classes, a friendly atmosphere towards students is maintained», student satisfaction was 100%;
- «During the classes, the pace of presentation of the material is convenient for perception and recording», student satisfaction was 92.3%;
- «Tasks for students' independent work are clearly formulated, support for its implementation is provided», student satisfaction was 92.3%;
- «Assessment of learning outcomes in the discipline is transparent and objective», student satisfaction was 92.3%.

At the end of the survey, students are asked to add questions that, in their opinion, should be added to this questionnaire to improve the training program, improve the quality of services provided and other activities university. However, the students limited themselves to the following answers: no additional questions; all the necessary questions are here; no ideas.

Recommendations:

The head of the department should familiarize staff and students with the results of the questionnaire and, if necessary, develop an action plan to improve the quality of educational services.
