Please write your suggestions, wishes, as well as what questions in your opinion need to be added to this questionnaire to improve the training program, improve the quality of services provided, improve the quality of distance learning and other areas of the university's activities. (Students' answers are presented in the original. The author's spelling and punctuation have been preserved):

- I find it difficult to answer;
- Are you satisfied with the training?

Based on the results of the questionnaire, the following conclusions can be drawn:

The majority of students report their complete satisfaction with the quality of the services provided, based on which it can be argued that according to these indicators, the quality of the services provided at the University met the expectations of students and, thus, fulfilled its task.

To the question «What is your attitude to the quality of the organization of the educational process? » the majority of students responded that there were no special complaints: 2nd year - 52.9%, 3rd year - 57.1%, 4th year - 47.1%. The data obtained indicate an improvement in the quality of organization of the educational process and educational services of the university.

Nevertheless, there is a small part among those surveyed who noted such answer options as «Inconsistency between the disciplines studied and the specialty being acquired. » (3rd year -4.8%, 4th year -5.9%), «Inconsistency between the importance of the subject and the number of hours» (3rd year -4.8%), «Overload with classroom activities» (2nd year -5.9%, 3rd year -9.5%, 4th year -11.8%), «Dissatisfaction with quality classes» (2nd year -5.9%, 3rd year -9.5%)

To the question: «What indicators are usually taken into account by teachers when making the final grade? » On average, 53.1% of students indicated the option «attendance», in second place - 25.6% «Results of intermediate tests, tests, colloquiums, etc.»

Relations «between students», «between teachers and students (in the educational process)», «between students and curators», «between students and administration», «between students and employees of departments (library, student department, etc.)», «between students and the security service» are being assessed by respondents, mainly as «friendly» and «with more benevolent than unfriendly» accordingly, which fully corresponds to the high level of satisfaction with the moral and psychological climate in the student environment.

To the question «Which student problems are of particular concern to you now? » students put «Quality of organization of the educational process»- 38.2%. Next – «quality of food and prices in the student canteen» - 34.6%. In the third position – «Employment by specialty»– 19.6%.

To the question «**Do you need additional consultation on disciplines?** » average **89.3%** respondents responded that they did not need additional consultation.

Recommendations:

The head of the department should familiarize staff and students with the results of the questionnaire and, if necessary, develop an action plan to improve the quality of educational services.
