**on the results of the survey**  
**“Satisfaction of 2-5 year students with educational services”**  
**in 2023 – 2024 academic year**

**Departments:** Automation of Production Processes, Power Engineering Systems  
**Specialty:** 6B07109 Electric Power Engineering

In October 2023, the Center of Quality Management and Accreditation conducted an annual survey on the satisfaction of 2-5 year students with the quality of services provided.

The survey purpose: To identify the degree of respondents’ satisfaction with the quality of the educational services provided and the other areas of the University activities.

The results of the survey were processed and presented in a summarized form with guaranteeing the confidentiality of students’ personal opinions.

In specialty 6B07109 Electric Power Engineering, 225 respondents took part in the survey:

- 
- 2 year – 58 students (49.6%);
- 3 year – 124 students (94.7%);
- 4 year – 43 students (47.8%).

**Modes of training**

- Budget – 194 students (86.2%);
- Paid – 31 students (13.8%).

In the course of the survey there were obtained the following results.

Indicators:

**1. Are you satisfied with the quality of the services provided?**

1.1 The learning process in general
1.2 Class schedule
1.3 Organization of independent work
1.4 Practices
1.5 Organizing and conducting SIWT
1.6 Organizing and conducting laboratory work
1.7 Satisfaction with the library work
1.8 Possibility of access to full-text databases of scientific publications
1.9 Living conditions in the hostel
1.10 Quality of medical care
1.11 Catering at the University (prices, product range, quality of prepared dishes)

## 9. What is more important for you to get as a result of studying at the University

**Please write your suggestions, wishes, as well as what questions in your opinion need to be added to this questionnaire to improve the training program, to improve the quality of services provided, to improve the quality of distance learning and the other areas of the University activities. (Students' answers are presented in the original. The author's spelling and punctuation have been preserved):-** Никакие

- Quality of food, competitions, etc.
- No recommendations
- I think that the given number of questions and their content are sufficient in this questionnaire
- New material
- The testing is well composed, all questions are on topic.
- I think that the questions are very good and do not need to be supplemented
- No need to add
- I don't know
- Questions about corruption at the university.

Based on the results of the questionnaire, the following conclusions can be made:

The quality of educational services at the University depends on a whole range of factors. A special place in it belongs to the educational process. Correct and effective organization of the educational process is the key to successful and high-quality training of specialists. The results of the questionnaire "Satisfaction of 2-5 year old students with educational services" indicate a high degree of satisfaction of respondents with the educational process at the University. 96.3% of respondents are satisfied with the educational process. For ease of analysis, let us consider in more detail the criteria by which respondents assessed their satisfaction with educational services.

The highest satisfaction rates (rating "excellent quality") were obtained for the following criteria:

- organizing and conducting laboratory work (96.3%);
- organizing and conducting SIWT (93.8%);
- organization of independent work (92.1%);
- satisfaction with the library work (92%);
- access to full-text databases of scientific publications (91%);
- class schedule (90.8%).

In these cases, the majority of students report their complete or partial satisfaction, which suggests that the educational program at the University met the students' expectations according to these criteria.

Students rated the following criteria as "good quality": practices (86.9%), quality of medical care (76.2%), living conditions in the hostel (72.3%), and organization of catering at the University (73.5%).

Such satisfaction rates indicate that the University successfully fulfills its main task: providing quality education to students. However, despite these positive results, there is always room for improvement and further development. To improve the curriculum and improve the quality of services provided, students wrote their proposals\*: "The schedule should be extended to 3 years!!!", "Raise the standard of living in the hostel", "Physical education should not be the first class in the schedule, it is advisable to put it last", "Reduce the number of hours for humanities and increase the number of technical subjects", "Improve the schedule.

86.3% of respondents have the information of academic mobility. Based on this, it can be understood that the University successfully implements the program of outgoing and incoming academic mobility, which contributes to the improvement of the quality of higher education, increasing the effectiveness of scientific research, establishing internal and external integration links, and using global educational resources.

Psychological climate is an important characteristic of the comfort of the educational environment, which is considered as the immediate environment of a person, as well as the conditions within which he interacts with this environment. It can be seen from the presented results, the relationship between students, teachers and students (in the educational process), curators and students, administration and students, employees of departments (library, student department, etc.) and students, security service and students are mainly assessed by respondents as "friendly" and "more friendly than unfriendly", respectively, which fully corresponds to the high level of satisfaction, is a good indicator of the moral and psychological climate in the student environment.

55.1% of students do not participate in the university's scientific work. Students explain their lack of participation in scientific work by various factors, such as being overloaded with studies and work, lack of motivation and lack of interest in scientific work.

More than half of the students (60.2%) of the University do not use the opportunities offered for personal development, such as sports sections, creative clubs and the student trade union "Zhas Orda". The reasons are limited time or absence of desire to use these opportunities.

The University material resources fully satisfy the needs of most of the students surveyed. However, students left comments, where the main suggestions are related to updating the software, improving the speed of the Internet and the quality of computers.

In general, the survey results indicate the need to further improve the University work to increase students' awareness of the possibilities of academic mobility, improve the quality of the educational process, and form conditions for the active involvement of students in scientific and extracurricular activities.

### **Recommendations:**

The head of the department needs to familiarize the staff and students with the results of the survey and to discuss them during supervisory hours; if necessary, to develop an action plan to improve the quality of educational services.

Students can request the survey results by email from the Center of Quality Management and Accreditation [cqma\\_kstu@mail.ru](mailto:cqma_kstu@mail.ru).
