For the option “If you answered “not satisfied” to the previous question, give recommendations to improve the services provided”, the students indicated the following options*:

- The disciplines in the 1st and 2nd year do not really satisfy our specialty. There is very little programming and too many disciplines not too necessary for our profession, such as philosophy, cultural studies, economics, which are unlikely to be absolutely useful
- I would like to see more discipline in the educational process and slightly reduce the load of disciplines “for general development”,
- Few major subjects
- Properly allocate time for special subjects, as they are very necessary. I think that a lot of time is allocated to humanitarian subjects. However, we are IT specialists
- The current material I study in physics and cultural studies does not correlate with the set of knowledge I need, which would be useful to me as an IT specialist. As an example: Studying such a topic as “The motion of a solid body around a fixed axis”.
- More programming, less unnecessary disciplines

Please, write your suggestions, wishes, as well as what questions in your opinion should be added to this questionnaire to improve the training program, to improve the quality of services provided, to improve the quality of distance learning and other activities of the university. (Students' answers are presented in the original. The author's spelling and punctuation have been preserved):

- What amenities are needed for students(power outlets in the hallway, auditorium for students...);
- Enough;
- I don't need anything anymore;
- A water bottle.

Based on the results of the questionnaire, the following **conclusions** can be drawn:

The majority of students report their full satisfaction with the quality of services provided, based on which it can be stated that according to these indicators, the quality of services provided at the University met the expectations of students and thus fulfilled its purpose.

To the question **“What is your attitude to the quality of the organization of the educational process?”** the majority of students answered that there are no special complaints: 2nd year - 61.5%, 3rd year - 57.1%, 4th year - 82.3%. The obtained data indicate the improvement of the quality of the organization of the educational process and educational services of the university.

Nevertheless, there is a small part of respondents who noted such answer options as "Disciplines studied do not correspond to the specialty they are studying" (2nd year - 15.3%, 3rd year - 14.3%, 4th year - 11.7%), “Inconsistency of the subject importance with the number of hours” (2nd year - 5.1%, 3rd year - 14.3%, 4th year - 5.9%), “Overload of classroom classes” (2nd year - 65.1%), “Dissatisfaction with the quality of classes” (2nd year - 12.8%, 3rd year - 14.3%).

To the question: **“What indicators, as a rule, are taken into account by teachers when making the final grade?”** 53.5% of students indicated the option “activity in classes (seminars), answers to the teacher's questions, solving problems, etc.”, in second place - 15.8% “Results of interim control works, tests, colloquiums, etc.” and in third place - 8.3% “Attendance”.

Relationships “between students”, “between teachers and students (in the educational process)”, “between student and supervisor”, “between students and administration”, “between students and employees of departments (library, student department, etc.)”, “between students and security service” are assessed by respondents, mainly as “benevolent” and “rather benevolent than not benevolent” respectively, which fully corresponds to a high level of satisfaction with the moral and psychological climate in the student environment.

However, it should be noted that a small part of respondents noted such answer options as **“rather not benevolent than benevolent”** and **“negative”** in relations **“Between teachers and students (in the educational process)”**, **“Between students and administration”**, **“Between students and employees of departments (library, student department, etc.)”**, **“Between students and security service”**.

To the option **“If you answered “Rather not benevolent than benevolent” and “Negative”** to the previous question, give recommendations for improvement,” learners indicated “A little more respect for students because they treat us rather unkindly,” security is rude.

On the question **“What student problems are of particular concern to you now?”** the students put “Quality of food and prices in the student canteen” in the first place - 45.1%. Next – “Quality of the organization of the educational process” - 37.8%. In the third position – “Quality of teaching (conducting classes, assessment of knowledge, etc.)” - 33.4%.

On the question **“Do you need additional counseling in disciplines?”** 93.3% of respondents answered that they do not need additional counseling.

Recommendations:

Head of the department to familiarize the staff and students with the results of the questionnaire, if necessary, to develop an action plan to improve the quality of educational services.
