According to the results of the questionnaire, the following **conclusions** can be drawn:

The choice of specialty is a very important aspect in the life of young people. Some do it consciously, others unconsciously, by the coincidence of external circumstances.

The study showed that 25% of surveyed students found it difficult to answer, 21.4% - “personal inclination to a certain type of activity, assessment of their own abilities” and “low passing score for a specialty”. Other relatively significant criteria were: “opinion and recommendations of parents/relatives” - 17.9% and “prestige of specialty” - 7.1%.

The source of obtaining information about the university, faculties and specialties among the majority of first-year students are relatives, acquaintances (42.9%).

The majority of students report their satisfaction with the choice of educational program on which they study - 78.6%.

To the question “Do you easily cope with the study load?” 50% of students answered that it is easy. The rest 42.9% answered “it is difficult during the session”, 3.6% “difficult”, 3.6% found it difficult to answer.

Relationships “between students”, “between teachers and students (in the educational process)”, “between student and supervisor”, “between students and administration”, “between students and employees of departments (library, student department, etc.)”, “between students and security service” are assessed by respondents, mainly as “benevolent” and “rather benevolent than unfriendly” respectively, which fully corresponds to a high level of satisfaction with the moral and psychological climate in the student environment.

However, it should be noted that a small part of respondents noted such answer options as **“rather not benevolent than benevolent”** and **“negative”** in the relations **“between students and employees of departments (library, student department, etc.)”**, **“between students and security service”**.

For the option **“If to the previous question you answered “rather not benevolent than benevolent” and “Negative” write down why”** the students indicated the following: “So many conflicts because of checking bags, 90 percent of students do not bring anything to the university or there is nothing so harmful that it is necessary to inspect the bags of each student, but domestic conflicts it creates just on hurrah”.

* Students' answers are presented in the original. The author's spelling and punctuation have been preserved.

64.3% of students noted that they always have access to the necessary information regarding the educational process and extracurricular activities. However, 28.6% of respondents chose the answer “no, not always”.

In response to the question “How would you rate the quality of class delivery?” the following information was obtained:

- “The material is presented clearly, accessible, in a logical sequence” satisfaction of students amounted to 100%;

- “During the lessons the main thing is emphasized, reasonable conclusions are made” satisfaction of students amounted to 100%;

- “During the lessons a friendly atmosphere is maintained in relation to the students” satisfaction of students amounted to 100%;

- “During the lessons, the pace of presentation of the material is easy to understand and write down” learner satisfaction was 100%;

- “The tasks for independent work of students are clearly formulated, support is provided for its implementation” satisfaction of students amounted to 100%;

- “Assessment of learning outcomes in the discipline is transparent and objective” satisfaction of students amounted to 100%.

At the end of the questionnaire, students are asked to make suggestions and questions that in their opinion should be added to this questionnaire to improve the training program, improve the quality of services provided and other areas of the university. Students suggested the following: “give sufficient time for homework”, etc.

Recommendations:

Head of the department to familiarize the staff and students with the results of the questionnaire, if necessary, to develop an action plan to improve the quality of educational services.
